

## What is an attic fan?

An attic fan is a ventilation fan which **removes hot air** from attic and **regulates the heat level** of the building.

## Why an attic fan?

During a summer heat wave, your attic temperature could go as high as 150F. It can cause numerous problems like **higher electric bills**, **mold outbreaks**, and the **deterioration of your roof** over time. An attic fan solves the problem by exhausting hot air from the attic, keeping the inside of the building cool.

**You can save up to \$300 annually on your electric bill if you use attic fan !**

## Advantages of a solar attic fan

- ❖ Lower electricity bill
- ❖ Better roof health
- ❖ Highest airflow conversion efficiency
- ❖ Reduces the stress on your HVAC equipment
- ❖ Made in the **USA**
- ❖ Corrosion resistant, built to last
- ❖ **26%** Federal Tax Credit
